Individual Student Assessment Accessibility Profile (ISAAP)

Rob Bauer

September 16, 2015

What is ISAAP?

A web-based tool designed to facilitate selection of Designated Supports and Accommodations that match student access needs for the Smarter Balanced assessments.

Accommodations

- Accommodations from IEPs will be loaded once into ART from TieNet as they were this year.

- Updates to IEPS and new IEPS will need to be loaded separately into ART

- Updates to ART can be done three different ways:

    1. Access ART and add accommodations individually for each student

    2. Create an excel or csv file of student accommodations to be imported to ART

    3. Use the Individual Student Assessment Accessibility Profile (ISAAP) tool to compile accommodations and designated supports for students. Export a file from ISAAP to be loaded into ART.

Designated Supports

▶ Any students who do <u>not</u> have IEPS but require Designated Supports can have the Designated Supports loaded in three different way:

1. Access ART and add designated supports individually for each student

2. Create an excel or csv file of student accommodations to be imported to ART

3. Use the Individual Student Assessment Accessibility Profile (ISAAP) tool to compile accommodations and designated supports for students. Export a file from ISAAP to be loaded into ART.
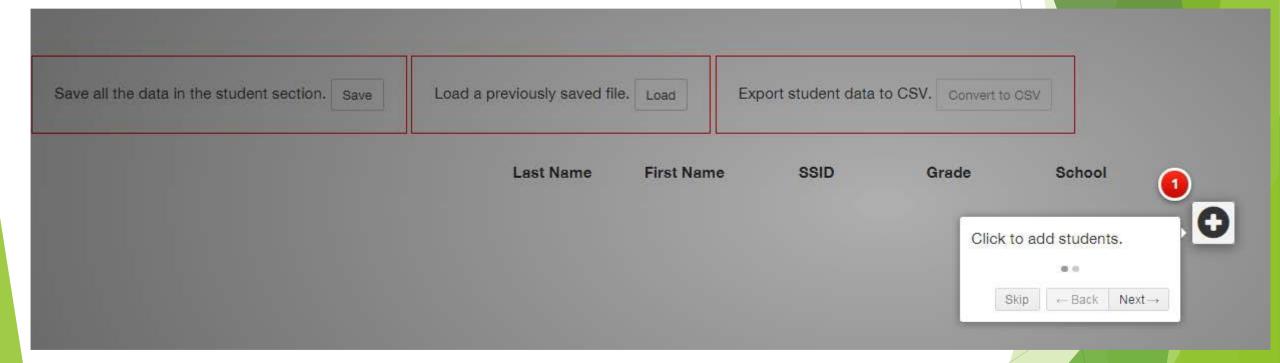

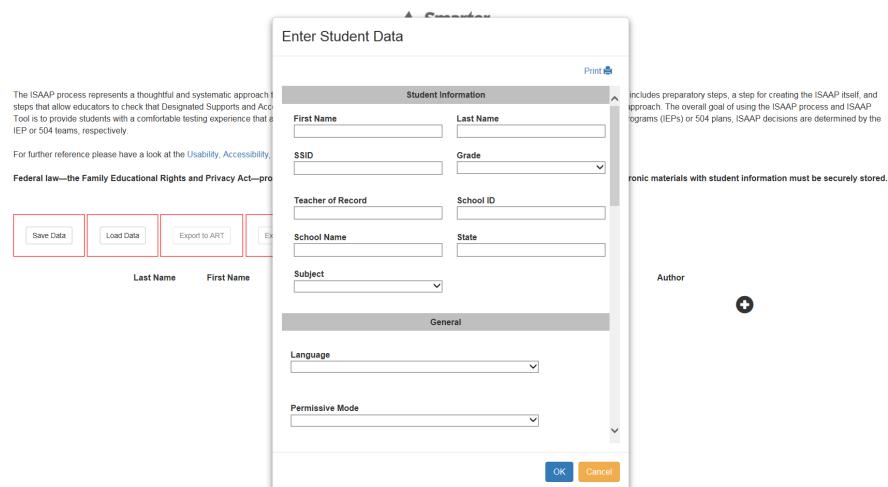

Access to ISAP

▶ Got to Smarter Balanced Website.

▶ Click on *Parents & Students*

▶ Click on *Support for Under-Represented Students*

▶ Scroll down to the *The New Web-based ISAAP Tool*

▶ There you will find:

- ISAAP Tool Instructions (PDF)

- ISAAP Tool

- ISAAP Module (Training Module)

Getting Started
